COMP 003 – COMPUTER PROGRAMMING 2
SECOND SEMESTER, AY 2025-2026

MIDTERM LABORATORY ACTIVITY NO. 5

Name: _____ **Score:** _____

Name: _____ **Program:** _____

Section: _____ **Faculty:** **Asst. Prof. Ma. Ymelda Batalla**

Midterm Laboratory Activity Name: String Analysis and Transformation

Learning Outcomes:
Upon completion of the activity, the students should be able to:
- Demonstrate the ability to apply theoretical concepts learned in C++ strings through an accurate program source code;
- Analyze the program results critically and interpret the data to validate accurate output; and
- Collaborate and cooperate in a team to accomplish the group task.

Instructions:
- This activity is composed of two students per group.
- Create a C++ program that will accept a sentence (at least 1 sentence) and perform the following:
  - Count the number of vowels and words in the sentence;
  - Covert all the vowels into UPPERCASE;
  - Reverse the sentence;
  - Display the all the necessary output: original sentence, vowel and word count, transformed sentence(uppercase), and reverse sentence.
- Note: Don't use any advanced algorithm.
- Each group must provide the program source code link in the given google sheets.

The following criteria will be used to check the group's work or output:

CRITERIA	EXCELLENT (3)	FAIR (2)	POOR (1)	SCORE
Functionality (x5)	The program works and meets all the required requirements.	The program works and partially meets the specified requirements.	The program does not meet all the required requirements.	
Output (x2)	The program displays accurate and all the required output.	The program displays minimal output.	The program does not display any output.	
Readability (x1)	The program code is well organized and can easily be understood.	The program code is somewhat organized and understood.	The program code is poorly written.	
Documentation (x1)	The program code is well commented.	The program code lacks the major comments that make the code difficult to understand.	The program code does not have any proper documentation.	
Submission Time (x1)	April 16, 2026 Until 5:00PM	April 16, 2026 Until 5:30PM	April 16, 2026 Until 6:00PM
